FOR IMMEDIATE RELEASE

AXEL Launches New Product: MoldWiz CX-175

February 27, 2018, MONROE, CONNECTICUT: AXEL Plastics Research Laboratories, Inc. ("AXEL"), a leading manufacturer of proprietary external and internal mold releases and process aid additives, is pleased to introduce a new mold cleaner to the market. MoldWiz CX-175 ("CX-175") is a synergistic blend of solvents and surfactants that is used as a mold cleaner. It is recommended for use to remove polyester resin residue, as well as other polar resins such as acrylics, epoxies, polyurethanes, and phenolics. It is also effective for removing build-up of styrene and LPA.

CX-175 is free of NMP, aromatics, and contains bio-renewable materials. In addition to being excellent at removing polyester resin residue, it is highly effective at removal of semi-permanent mold releases.

About AXEL: AXEL Plastics Research Laboratories, Inc. is a chemical additive company founded in 1941 and currently in its third generation of family ownership and operation. The business is registered to the ISO 9001:2008 Quality System and the company and its products are fully compliant with REACH and major worldwide regulatory requirements. AXEL serves the global market through direct sales and a network of stocking distributors and technically trained representatives. For more information, visit www.axelplastics.com.
